Welcome to Monkeys life

[Monkey world](#)

Monkey lives on trees and in mountainous area. **Monkeys** feed as predators on many organisms such as insects, bird eggs, lizards, and spiders. [Monkey breeding](#) Gestation periods for monkeys vary according to gender, for example, the gestation period of a rhesus monkey is 160-170 days, and baboons have a gestation period of about 178 days, and when monkeys are born, the young monkeys are mainly cared for by their mothers
